

# HYSOLV FOOTCHECK THE PROFESSIONALS CHOICE

Footcheck is a pre-calibrated footbath providing a rapid, simple and convenient way to accurately and consistently achieve the correct concentration for disinfectants used as a part of a biosecurity programme.

- **REMEMBER:** Fill in your audit sticker and/or record sheet.

## HOW TO USE FOOTCHECK

- 1 Position footbath on a level floor near a suitable wall. 2 Prop the bath against a wall to achieve a 45 degree angle (as illustrated) and lift the hinged lid. Ensure the bath is level. 3 Carefully pour concentrated disinfectant into the appropriate internal measuring chamber, or chambers. Fill the 1% chamber for 1% final or half fill for 0.5% concentration. Fill the 2% chamber for 2% concentration or both 1% and 2% chambers for 3% concentration. 4 Lower footbath so that the base is flat on the floor.

- 5 Fill with clean water to final fill line (Final volume 15 litres). Swirl bath or its contents to mix disinfectant. 6 Complete an audit sticker and apply to front of footbath in the space provided. 7 Keep lid closed when not in use to maintain efficacy by keeping contents clean, reducing evaporation or dilution. 8 Remove lid when emptying bath to clean or replenish. After replenishing contents, close the lid and give it a swirl to mix. N.B. Dispose of used contents responsibly in accordance with disinfectant instructions.

## FOOTWEAR DISINFECTION

- Disinfection is only effective after thorough cleaning – remove excess soil and organic matter before dipping footwear.
- Replace contents of the Footcheck bath at least once a week; more frequently if disinfectant becomes heavily soiled.

**Product name:**

**InterSure FD**

**InterFarm 500**

**Interkokask Conc.**

**Rhodasept**

**Concentration:**

**1%**

**0.5%**

**3%**

**3%**

**Effective against:**

Bacteria, fungi and viruses

Bacteria, fungi, viruses and spores

Bacteria, fungi, viruses, roundworms and their eggs

Bacteria, fungi and viruses

**Use Biocides Safely. Always read the label and product information before use.**

## HAND HYGIENE

**Product name:**

**InterSoft DK**

**InterSoft D**

**InterSoft W**

**InterSoft tissues**

**Instructions:**

Rub into hands for 30 seconds without water then foam with water for 15 seconds and rinse - Especially soft skin cleaning and sanitiser

Alcohol-based hand sanitiser

Dissolves oil, grease and tar without solvents and rubbing agents (fruit scented)

Quick drying. Fast and effective against bacteria dermatophytes and lipophilic viruses
